EDUCATION

Dayananda Sagar College of Engineering, Bengaluru

2021 - 2025

Bachelor of Engineering in Electronics and Telecommunication, **CGPA: 8.88**

TECHNICAL SKILLS

- **SIEM & Security Tools:** Splunk, Microsoft Defender (EDR), Barracuda, Zscaler, Any.run, Code42
- **Security Operations:** Log Analysis, Alert Monitoring, IOC Analysis, Threat Detection, Incident Response
- **Networking & Security:** TCP/IP, DNS, DHCP, VPN, Firewalls, IDS/IPS, Active Directory, Linux
- **Threat Intelligence & Frameworks:** MITRE ATT&CK, Cyber Kill Chain, Diamond Model, OSINT
- **Other Tools:** ServiceNow, Sysmon, WHOIS, dnstwist, Sherlock

EXPERIENCE

Security Analyst – 1

Sept 2025 – Present

MitigataTM – Full-Stack Cyber Resilience

- Monitored organizational attack surfaces by identifying brand impersonation and infringement accounts across social media platforms using manual investigation and **Sherlock** in a virtual lab environment.
- Investigated suspicious and typosquatted domains using **dnstwist**, and verified domain legitimacy through **WHOIS**, registrar details, domain creation dates, and SSL certificate analysis.
- Identified phishing pages, malicious redirects, and counterfeit content targeting organizational brands across surface web platforms.
- Investigated third-party hosted mobile APKs for potential risks such as payload injection and unauthorized application distribution.
- Assisted in takedown activities for phishing domains, impersonation accounts, and infringement content by preparing technical evidence and investigation findings.
- Conducted investigations to identify potential **PII data leaks** involving executives across publicly accessible surface web sources.

Security Analyst Trainee

May 2025 – Jul 2025

SOC Experts

Bengaluru, India

- Monitored and analyzed simulated security alerts in **Splunk SIEM** to investigate detection and incident response workflows.
- Investigated phishing and malware threats using **Barracuda Email Gateway** and **Any.run sandbox**.
- Applied **Code42 DLP** for data exfiltration prevention.
- Analyzed basic Windows and network logs to identify suspicious activities during training labs.
- Gained exposure to cloud security monitoring concepts in AWS environments.

PROJECTS

SOC Home Lab using Splunk & Sysmon

2025

- Built a SOC home lab using **Google Cloud Platform (GCP)**, Ubuntu Linux, and Windows 10 virtual machines.
- Installed and configured **Splunk Enterprise** and **Splunk Universal Forwarder** for centralized log monitoring.
- Integrated **Sysmon** with a custom configuration file to capture detailed Windows security events.
- Used **SSH** for secure remote administration and configured firewall rules for Splunk Web access.
- Monitored Windows Event Logs and Sysmon logs using **SPL queries** to detect suspicious activities and authentication events.

CERTIFICATIONS

- **CompTIA CySA+ (In Progress)**
